LITHIUM TECHNOLOGY MAKES THE RXV ELiTE THE INDUSTRY LEADING GOLF CAR

The RXV has been setting the standard for superior golf car performance for nearly a decade and the RXV ELiTE is the latest step forward. By utilising proven Samsung SDI battery technology already found in electric cars, power tools and more, the RXV ELiTE is able to out perform, out last and be more available to your golfers.

The difference between ELiTE lithium technology and traditional lead-acid batteries - is night and day.

NO BATTERY MAINTENANCE

Samsung SDI lithium batteries don't require the labor involved with watering, terminal post checkups and cleaning like lead acid batteries. When you do the maths you'll be surprised how much maintenance time you could save.

ZERO MAINTENANCE

0 BATTERY CELL WATERING AND TERMINAL POST CLEANING

GREATER EFFICIENCY

The Samsung SDI batteries use less energy, charge in half the time and require less out-of-wall power than leading lead acid competitors. That means you can dramatically cut energy costs, and enjoy the extra revenue that comes from all-day uptime.

ENERGY EFFICIENT

59% MORE EFFICIENT VS. CLUB CAR

52% MORE EFFICIENT VS. YAMAHA

A LIGHTER FLEET AND HEALTHIER TURF

With batteries half the size and a fraction of the weight of lead acid, ELiTE vehicles weigh over 100Kg less than the equivalent lead-acid battery powered RXV. This takes a big load off of your turf, protecting one of your most valuable assets.

TURF PROTECTION

49 lbs LITHIUM BATTERIES

328 lbs LEAD ACID BATTERIES

UNPRECEDENTED 5-YEAR WARRANTY

E-Z-GO believes in the reliability and enduring performance of ELiTE Series vehicles so much that they come with a five-year, unlimited-amp-hour warranty. By providing this coverage, you and your course can eliminate costly out-of-warranty repairs.
